

## Anaté stunning debut single Confusion to be released on Nov 28<sup>th</sup>

**PARIS, FRANCE, Nov 14, 2020**

Emerging downtempo duo Anaté will release their debut single “Confusion” on November 28th on iTunes and all streaming platforms. The track shows a slow, dark mood, featuring Ana's emotive and soulful voice, rich tones of the piano and a dim trip-hop ambience. It was produced by Delman, mixed by Simone Coen and mastered by Giovanni "Meniak" Nebbia.

*"My debut single Confusion talks about duality. It's about the conflict between what we want and what we are 'allowed to want', between who we are and expected to be; between emotion and reason. We all experience moments of inner conflict like that. Confusion explores these contrasting concepts and invites us to embrace both".*

Confusion's video, directed by the Argentinian Fausto Torelli Tulissi, was filmed in Berlin. It explores duality in images, pictured as a constant back and forth between the heavy reality and a "dream world" - our inner world. It follows Ana's journey to the point where she is finally facing and embracing herself.

“Confusion” is the first single off Anaté's upcoming debut album titled “Confessions”. The album will feature 10 tracks, described by Ana as a "journey that leads us to being who we are when no one is watching. Ten confessions shared as songs".

[Pre-save Anaté's Confusion](#)

Ana is a young and talented singer and songwriter. She was trained since a young age in classical piano and was part of several musical projects as lead singer/songwriter and keyboards player. Ana kept writing music independently and

performing in Paris until meeting producer Delman and starting the Anaté project together.

Delman is a seasoned producer and guitar players. He performed as guitar player with several local bands from early 2000's to 2015, when he decided to focus on producing local artists and writing own music.

Their collaboration allowed to mix influences from artists of the past and present, with arrangements inspired by iconic trip-hop bands such as Hooverphonic, Massive Attack and Morcheeba, while vocal melodies and harmonies remind of artists such as Sade, Dido and Amy Lee.
